1. Preamble

In February 2021, the Malta Communications Authority (“MCA” or the “Authority”) published a consultation paper¹, outlining a proposed methodology for the assignment of additional spectrum for wireless broadband in the 700 MHz, 3.6 GHz and 26 GHz bands. Following consideration of the various responses received, a decision entitled ‘Assignment Process for Additional Spectrum for Wireless Broadband’ was published by the Authority in April 2021 (hereinafter referred to as the Decision)².

The Decision establishes the assignment process in respect of spectrum in the 700 MHz, 3.6 GHz and 26 GHz bands and the conditions attached to the resulting rights of use.

An authorised electronic communication service provider (‘ECS’) has lodged a formal request with the MCA for the assignment of spectrum in the **3.6 GHz band** to be used for the provision of electronic communications networks and services.

In line with the Decision, the Authority is hereby publishing a Call for Expression of Interest to determine the demand for spectrum in the pertinent band.

3 Introduction

The MCA, as the competent authority responsible for the effective management of the radio frequency spectrum, invites undertakings who wish to obtain access to **rights of use of radio frequencies in the 3.6 GHz band** in the Maltese territory to express their interest in line with the provisions outlined in this document and the Decision.

Subsequent to the receipt of interest pursuant to **Annex A – Expression of Interest**, the MCA will assess whether demand has exceeded supply. Should the demand for the 3.6 GHz band, as established in response to this Call, not exceed the availability of the radio frequency spectrum in the pertinent band, the Authority reserves the right not to issue a Call for Applications but to grant the relevant rights of use for the distinct band directly to those Applicants that submit an Expression of Interest.

Should a Call for Applications not be required, all Applicants submitting an Expression of Interest will be invited to submit information relevant to the Qualification of the Applicant. Failure by the Applicant to provide any of the required information or a failure to pass the Qualification Phase assessment, will result in the discarding of the relevant Expression of Interest and the disqualification of the Applicant from being awarded a licence for the band in question as part of this process. Should the demand for one or more distinct radio frequency spectrum bands, as established in response to this Call, exceed the availability of the radio frequency spectrum in the pertinent band, an invitation to participate in a binding Call for Applications leading to the grant of the rights of use for the indicated radio frequency spectrum band shall be published. **Only Applicants that have submitted a valid Expression of Interest in line with the requirements established in this document shall be allowed to participate in the said Call for Applications.**

The terms and conditions of the licence will be communicated to the Applicants either through a Call for Applications or, where demand does not exceed supply, through a Request for Information pursuant to the Qualification Phase. Applicants will be required to submit a one-time non-refundable administration fee, a deposit and a bid bond/performance guarantee in the form of a Bank Guarantee in order to be granted the right to use the radio frequency spectrum band. An Expression of Interest must be submitted to the MCA by completing the form contained in **Annex 1**, in accordance with the instructions in this Call.

4 Legal disclaimer

(1) Although every care has been taken in preparing this document, no representation, warranty or undertaking however so described, expressed or implied, in respect of any error or misstatement is or will be made or given, and no responsibility or liability will be accepted by the MCA or by any of its officers, employees, servants, agents or advisers, however so described, as to the accuracy or completeness of this document or any other written or oral information made available to any interested party or its advisers concerning this document, and any liability howsoever arising (including in respect of this assignment process) is expressly disclaimed. No information contained in this document shall form the basis for any warranty or representation however so described by the MCA.

(2) In submitting an application form, the applicant accepts in full and in its entirety, the content and the terms and conditions of this document and of all its appendices, including any subsequent clarifications issued by the Authority, whatever the MCA's corresponding conditions may be. The applicant is required to examine carefully and comply with all instructions, forms, provisions and specifications, however so described, contained in this document, or those that may be requested by the Authority on the basis of this Call.

(3) By accepting any rights of use that it may be offered, the applicant agrees that, as the holder of the rights of use, it is responsible for all costs, liabilities and losses, however so described, derived from the operation or non-operation of the rights of use or authorised service for whatever cause.

(4) The Authority, whilst providing such notice as it may consider appropriate in the circumstances, reserves the right to alter any of the deadlines or conditions outlined in this Call. Under no circumstances will the Authority, or its officers or advisers (however so described), be liable for damages, whatever their nature (in particular, but not limited to, damages for loss of profits) in relation to any such alterations, even if the Authority would have been advised of the possible liability for damages. No information contained in this Call shall form the basis for any warranty or representation, however so described, by or term of any contract with the MCA. In case any part of the text represented in this document is in contradiction with the text in the Decision MCA/D/21-4177 issued by the MCA, the text in that Decision will prevail.

(5) This assignment of rights of use of radio frequencies is governed solely by Maltese Law, and is subject to the exclusive jurisdiction of the competent Maltese Courts and, or Tribunals, however so described.

(6) Unless stated otherwise in this Call, any communications including any notifications, however so described, as referred to in this Call by an applicant to the Authority, must be in writing.

(7) The publication of this Call does not bind the Government and/or the Authority to assign the radio frequency spectrum or to proceed to a further stage in the process for the assignment of this radio frequency spectrum band.

5 Spectrum band being assigned

The spectrum band subject to this Expression of Interest is the 3.6 GHz band (3.4 GHz – 3.8 GHz) with the specifications, conditions and obligations, however so described, as specified in the Decision.

In this respect the Authority is sounding the market to see whether there is an interest in this band, which to-date is entirely unassigned.

Interested parties must not apply for specific frequencies in the respective band but are to submit the Expression of Interest for any number of Lots in the Spectrum Band subject to the **unrelaxed spectrum cap** for the band in question.

The Applicant must state:

- The maximum number of Lots in the respective band that it may apply for throughout the course of the Call ('Maximum Interest'). The Applicant needs to ensure that the Maximum Interest registered in any of the bands will cover the interest it might register in all stages of the Award process for the respective band including a possible auction.
- Its preferred assignment of Lots ('Preferred Option') for each of the respective bands.

An Applicant must not apply for spectrum in excess of the established Spectrum Cap³ and, or its declared Maximum Interest.

The overall demand for Lots in the respective band will be determined by the Authority on the basis of the interest as expressed by all the Applicants.

As part of its Expression of Interest, the Applicant should also identify its specific unpaired 5 MHz channels of first choice, giving its reasons for such a preference. This shall not detract in any way from the Authority's sole discretion to assign to the Successful Applicant/s the specific frequency channels (i.e. Lots) in the way it deems fit, taking in particular into account spectrum efficiency considerations.

³ The Spectrum Caps and the respective spectrum cap relaxation mechanisms are established in the Decision.

6 Assignment Process

Subsequent to the receipt of interest pursuant to **Annex A – Expression of Interest**, the MCA will assess the cumulative demand, as expressed, and will notify applicants on whether a competitive assignment or a direct assignment process will be undertaken.

6.1 Competitive assignment process

Should the demand for the distinct radio frequency spectrum exceed availability, then a Call for Applications will be extended to Applicants that submitted a valid Expression of Interest in line with the process as established in the Decision.

6.2 Direct Assignment process

Should the demand for the spectrum not exceed availability, the MCA reserves the right not to issue a Call for Applications but to grant the relevant rights of use directly to those Applicants that have expressed an interest for the respective bands. In this case, the MCA will proceed with the granting of the said individual spectrum band directly to the parties who have submitted a valid Expression of Interest in response to this Call.

All parties submitting an Expression of Interest **will be invited** to participate in an **individual** process leading to a Qualification Phase carried out by the MCA. Failure to provide any of the required information or a failure to pass the Qualification Phase assessment will result in the discarding of the relevant Expression of Interest.

The aforesaid Qualification evaluation will include but is not limited to the following areas:

- The Applicant's credentials;
- The Applicant's experience in establishment, operation and commercialisation of electronic communications networks;
- The Applicant's business plan; and
- Access to adequate financing for the venture.

Further detail, including a sample of the questions relevant to the qualification process are included in Annex 2.
